What Street Art				Figma crashes from user's phone			
Task 1: Change the view the popular category (2 taps are minimum)	21 (5)	yes with confusion	8 (3)	Was frustated because the Icon List view didn't work from the first time	Confused	-	?make Icon List view a bit bigger and/or modify it
Task 2: Find information about an artwork (1 tap is minimum)	3	yes	3	-	Done quickly, asked if it was the task	-	
Task 3: Find the page with works only by one artist (1 tap is minimum)	3	yes, with minimum taps	1	-	Done quickly, positive	-	
Task 4: Change your profile picture (3 tap is minimum)	6	yes	4	-	Done quickly, positive	integrate share my profile in Insta, case of usage: I'm an artist. And/or add my Insta button to my WSA profile	?make public profiles ?insta profile in WSA profile
Task 5: You liked a mural of Boris Johnson, dressed as a clown. Navigate us to see the mural (undoable, user can go only to a map, 3 tap is minimum)	1. 130 (but bumped into the art from main carousels, opened artwork page and then we stopped user) 2. open the artwork in 20s, then frustrated with map, then we directed user to home page and start again, then completed in 10	done on the second try	1. 37 2. 4	1. No search bar, "You liked it" - user didn't pay attention at the first, can't use a picture from Scan, there is a clown picture, recently added - not clear added by who 2. Map doesn't work, lost the carousel, went from the artwork to map and saw the pointer and said: "let's pretend it"	Lots of frustration and laugh	User comment: "rather google it", "I need to find saved function", "is it this one? I think, I found the clown"	1. Liked/saved Button on map -> liked/saved page 2. Boris Mural must be only in one "place" 3. Map point -> to image preview + navigate button 4. ?Add navigation from Artwork page
Conclusion				I could say more it was finished. But it's only the begging. No navigation Button. Cannot find pages from earlier anymore.	Cool idea and seems that the app will be used by other people also.	Map doesn't work and needs some color to my location and for marker of the artwork, I chose/redirected from	Add color in map (my location, the artwork)
Street Art Cities							
Task 1: Find information about an artwork	2s	yes			Done quickly, positive	-	
Task 2: Find the page with works only by one artist	- after 4s, ut she didnt realized it - task finsed after 35s	yes		Artist name is not clickable. The artist list starts from Various Artists	Confused	-	
Task 3: There are 2 murals south of the park. Pick one and navigate us there	55s	yes		got problems to find north south & herself	Confused	-	

	Time, seconds	Done or not	How many taps	Frustrations	Feelings	Users Remarks	To fix
Conclusion				No search bar for cities. Map directions (North, South) are missing. Upcoming events (are not not near and only two)	Doesn't like description text, insufficient, useful info is missing. Not that bag created UI	Likes the smoothness of page's changing, nothing like Lieferando	
User 2							
What Street Art				Figma crashes from user's phone			
Task 1: Change the view the popular category (2 taps are minimum)	12	yes	2	List view Icon looks like a sandwich menu Icon	slightly unsure	-	make list view icon more different from sandwich
Task 2: Find information about an artwork (1 tap is minimum)	2	yes, with minimum taps	1	-	Done quickly, positive	-	
Task 3: Find the page with works only by one artist (1 tap is minimum)	2	yes, with minimum taps	1	-	Done quickly, positive	-	
Task 4: Change your profile picture (2 tap is minimum)	5	yes, with minimum taps	2	-	Done quickly, positive	-	
Task 5: You liked a mural of Boris Johnson, dressed as a clown. Navigate us to see the mural. Find it on a map (4 tap is minimum)	80 wrong picture at first, then found the art on map in 7	yes	10	Didn't know who the Boris Johnson is	Unsure	There is search somewhere here. Can I scan it?	
Conclusion				Map bottom area with carousel - make title bigger, add color for carousel to make it more outstanding, too many images at the same time. Key word search is needed.	Make one image to be bigger then I taps on it to decide if it's interesting for me. Intuitive for usage. Why people will use it? Add some competition/show off parts like to share profile - look how cool am I.	Background is too dark. Possibility to change backgroung color. Map is too dark, Satelite or 3d is needed for normal navigation. No voice feature (search would be much better). Text - it should turn blue when you tap on it, so you know it worked	?horizontal carousels with one image, which pop up
Street Art Cities							
Task 1: Find information about an artwork	3s	yes	-	-	Done quickly, positive	now alphabetical order in selecting city before task	

	Time, seconds	Done or not	How many taps	Frustrations	Feelings	Users Remarks	To fix
Task 2: Find the page with works only by one artist	1st fail 1m2s 2nd try 25s 3rd try 31s	no		-	slow	-	
Task 3: There are 2 murals south of the park. Pick one and navigate us there	ca. 2m30s	yes, but with help		cant orientate herself	confused, slow	she needs to know where's north and south	
Conclusion	took long time to fulfill tasks			Home screen confusing for her, cant find pictures etc. due to unclear swipe-up option. Map is confusing to her, needs navigation help (north/south & GPS),		if there's a city list it needs an alphabetical order	How to have more than one image for one artwork - gallery?
